

### OVERVIEW

ViewSTATION is a revolutionary yet simplistic approach to replaying all types of analog & digital CCTV video media. Its innovative navigation allows complete access to all levels of users which dramatically reduces the backlog of level 1 CCTV video processing, as police users can now extract backlog of level 1 CCTV video processing, as police users can now extract evidence in a very short period of time. ViewSTATION has been in successful operation for several years at police divisions and custody suites. It has become a vital tool in quickly identifying suspects and immediately producing video evidence.

### COMPACT

Our latest member of the ViewSTATION range; the Compact combines renowned ViewSTATION software with a portable, standalone unit, resulting in a system which is easy to transport and maintain. The intuitive interface allows users to quickly and easily process CCTV footage in both analog and digital formats, and then perform a variety of actions including enhancing, printing, saving and copying, ready for interview or prosecution. Feedbacks from customers have praised ViewSTATION as being a serious time-saving tool in speeding up prosecution of crimes caught on CCTV.
